England

.22 Box-ID
.22 Boxes of the World

Created and Edited By
Roger E. Huegel

2013

Map and flag from Wikipedia.org
England is part of Great Britain, which consists of England, Scotland, Wales and Northern Ireland. Located off the Northwest coast of the European continent. The capital is London. The economy is based upon manufacturing. This is an English speaking country. The money system is based upon the Pound Sterling.

England is rich in the history of .22s. Both in arms development as well as ammunition. The history of .22s in this country is based upon mergers and private label sellers. They now only have one manufacturer remaining in production today, this is Eley, which is still producing some of the best target loadings in the world today.

**Thanks**

Special thanks to the following collectors for helping me with this project by supplying me with box images and sharing their knowledge. Presented in alphabetical order.

**ENGLAND**

**MANUFACTURERS**

<table>
<thead>
<tr>
<th>Manufacturer</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>BIRMINGHAM SMALL ARMS.</strong></td>
<td>This was a major producer of rifles, but the only .22s they sold were private label loadings produced by Kynoch sometimes before 1930. Their offices and manufacturing was located in Saltley.</td>
</tr>
<tr>
<td><strong>ELEY BROS. LTD.</strong></td>
<td>The history of this manufacturer dates back to 1828 making them not only the largest manufacturer in England, but also the oldest. Their main offices were in London. They probably first were known just as Eley Bros., but no .22 boxes are known from that era. They were one of the leaders in the introduction of smokeless and semi-smokeless powders. In 1918 they were merged with Kynoch Ltd., Nobel Industries, Birmingham Metals and Munitions, and Kings Norton to form the new Nobel Industries Ltd.</td>
</tr>
<tr>
<td><strong>G.E. GREENE &amp; CO.</strong></td>
<td>This was a private label seller who had some .22s produced under their name by I.C.I. They sold these .22s in the 1930's. Exact dates of operations are not known at this time.</td>
</tr>
<tr>
<td><strong>W.W GREENER.</strong></td>
<td>This was a sporting goods dealer with locations in London, and Hull. They were major dealers in .22 cal. target rifles. In the 1930's, they imported at least one lot of private label .22s from R.W.S. of Germany. They even had their own headstamp. They were not just a retailer but one of England’s most famous and long established family firms of gunmakers, founded in 1829 and by 1923 operated the largest sporting gun factory in the world. They ceased and were sold in 1965.</td>
</tr>
<tr>
<td><strong>IMPERIAL CHEMICAL INDUSTRIES LTD.</strong></td>
<td>This was a manufacturer who produced .22s from 1926 to 1962. I.C.I. was the result of a name change from Nobel as a result of mergers. They were major producers of .22s, as well as other ammunition for both sporting and military uses. They had factories in Witton and Birmingham and offices in London. They were formed into the Imperial Metals Industries (Kynoch) Ltd. in 1962. During their time of operations they developed many innovations in materials and produced a wide range of target and high speed loadings.</td>
</tr>
<tr>
<td><strong>IMPERIAL METALS INDUSTRIES (KYNOC) LTD.</strong></td>
<td>This manufacturer was a result of a name change from I.C.I. in 1962. Their offices were still in London and they had manufacturing plants in Witton and Birmingham. They also continued I.C.I. relationship with I.M.I. of Australia. Under the Eley brand, they were still producing .22s as of 1986, including various high speed and target loadings. They are the only producers of .22s in England today. I.M.I. is the peak of a triangle which was the result of mergers of at least five prior companies. They are still major exporters of .22s to the world, including the U.S.A., where their TENEX target cartridges are considered to be some of the best.</td>
</tr>
<tr>
<td><strong>F. JOYCE.</strong></td>
<td>This was a sporting goods dealer who sold at least one lot of private label .22s before World War I. No boxes are available for cataloging at this time but some .22s with a &quot;J&quot; h/s are known, which is assumed to be the private label headstamp of this company. Dates of operations are not known at this time. Their offices were at 7 Suffolk Lane, London. They also imported Dominion .22s from Canada. They were not just a sporting goods dealer but a major manufacturer of caps, wads, rimfires and shotshells.</td>
</tr>
<tr>
<td><strong>K.S.C.</strong></td>
<td>One can of 6 m/m Floberts is known to exist. The address on the label is London. The cartridges have a raised &quot;E&quot; h/s which would indicate that the Eley Bros. Ltd. was the manufacturer. This would make them a private label seller. No other data is known at this time.</td>
</tr>
</tbody>
</table>
**KING'S NORTON METAL CO., LTD.** This manufacturer produced .22s from approx. 1901 to 1918. Main factory was in Birmingham but they also had a loading plant at Abbey Woods in Kent. Their Cayenite was first advertised in 1906 in both black and smokeless powders. Their H.P.S. (Highest Possible Score) was advertised from 1910. In 1918, they were merged into the group of manufacturers to form Nobel. All of these boxes must be considered rare.

**KYNCH LTD.** This manufacturer operated as Kynoch & Co. from 1864 to 1884. It is not known if Kynoch produced .22s during this period, as no boxes with this name have been reported. In 1884, they changed their name to G. Kynoch & Co. again. No .22s reported from this period. In 1889 they again changed their name to Kynoch Ltd. All Kynoch boxes at this time have this name. Kynoch was a major manufacturer of sporting ammunition with major exports, but they do not seem to have enjoyed any private label business. In 1918, they were merged into the new Nobel.

**L. LEPERSONNE & CO LTD.** This is a private label seller operating at 7 Old Bailey, London during the post-World War II period. They had contracted for at least one lot of private label loadings under the LEPCO brand. These .22s were produced by S.A. des Explosifs DuHavre which is a Belgium manufacturer. (Lepco) is no longer in business. They suffered badly in WW2 when their sources in Belgium were smashed by the Nazis, and they never recovered. **SEE: Belgium**

**MIDLAND GUN CO.** This is a private label seller. They were founded in 1889 in Birmingham and in 1925 their factory was know as the Demon Gun Works. They made their own Guns, shotshells and rimfires. They closed after WW2.

**NOBEL INDUSTRIES, LTD.** This manufacturer produced .22s from 1918 to 1926. Nobel was a well-established manufacturer of ammunition in Europe before they expanded to England. They used Kynoch Ltd., Nobel Industries. Birmingham Metals and Munitions and Kings Norton to form a new company by the name of Nobel Industries Ltd. It is not known if Nobel Industries produced .22s before the merger or not. During this period, Nobel developed brass cases and high speed loadings. In 1926 the name was changed to Imperial Chemical Industries.

**R.W.S. IMPORTS.** This was a German manufacturer, who during the pre-World War II period produced loadings for the Society of Miniature Rifle Clubs. A special box with the S.M.R.C. name was used.

**SUSSEX ARMOURY.** This was a private label seller. Founded in 1968 in the county of Sussex, they then opened shops in London and Manchester selling air guns and pellets and blank firing guns. They went bust and closed in 1982. The loadings were produced in Italy by Fiocchi.

BIRMINGHAM, 6, ENGLAND
Mr Accles severed his active connection with Accles and Pollock Ltd, shortly after its formation, and devoted his time to consulting and experimental work in connection with small-arms and ammunition. For three years he was engaged with Birmingham Small Arms Company Ltd, on consulting and experimental work on automatic small-arms, until in 1913 he recommended manufacture at Aston in conjunction with Mr. G. E. Shelvoke, as Accles & Shelvoke Ltd.

The “CASH” pistol was first manufactured by Accles and Shelvoke Ltd, around 1913, but manufacture was interrupted by the First World War.

After several years of exhaustive experimenting, a weapon for stunning animals, as perfect as humanely possible, was placed on the market, and out of compliment to the originator of the idea, Accles & Shelvoke Ltd, named their production the “CASH” Captive Bolt Pistol.

Since we are unable to determine if cartridges are shorts, longs or long rifle we use the term “CASH PISTOL” and use “CP-x” to classify.

CP-1  .22 (CASH PISTOL). “BLUE LABEL, 2 GRAIN”. Blue box with black printing. White over-label with red printing stating FOR HEAVY BEASTS AND PIGS OVER 220 POUNDS. Slip-in style box. Contents unknown.

LR-8

LR-3. **.22 LONG RIFLE.** "FOR SINGLE SHOT RIFLES ONLY". Buff label with brown printing. White, pill box style box with a slip in tray. Blue side sealing label with black printing. Contents are unknown.

LR-4. **.22 LONG RIFLE (HOLLOW POINT).** “FOR RIM FIRE RIFLES”. Same as LR-3 except top over stamped in black ink HOLLOW POINT BULLETS.

LR-5. **.22 LONG RIFLE.** "FOR SINGLE SHOT RIFLES ONLY". Buff label with red printing. Buff side sealing label with red printing. Labels only exits at this time.

LR-6. **.22 LONG RIFLE (UNPRIMED CASES).** Box of 100. Photo only is known at this time.

LR-7. **.22 LONG RIFLE (HOLLOW POINT).** “GREASELESS”. No information available at this time except; “E-13” h/s on a copper case. Lead Bullet.

LR-12  .22 LONG RIFLE. “SMOKELESS”. 100 rd. buff box. White over-label with red and black printing. Contents unknown

**Story from John Kuntz:** Seems when they decided to come out with a long rifle they thought using an over label would save some money. It came out wrong saying only LONG, (at least on the top) so it was then decided to actually stamp the word RIFLE on each box. So much for a good idea that went wrong, twice. The side label shown below was printed correctly.

LR-12.5  .22 LONG RIFLE. “SMOKELESS”. LR-12 box with the correct “.22 LONG RIFLE” overlabel on the box top.

WA-l  .22 WIN. AUTO. No information about this box is known at this time.

WRF-l  .22 WIN. FIRE. Red label with black printing. White, two-piece, half-split box. Full wrap-around end label with black printing. "E-17” h/s on a copper case. Lead bullet.

S-1  **.22 SHORT.** “FOR 22 REPEATING RIFLE”. 100 rd two-piece black mottled box. Blue label with black printing. Contents unknown.
This is a private label seller who probably had his .22s made by I.C.I. By the box style, this company sold these .22s in the 1930s. Dates or sales are not known at this time.

W.W. GREENER was a sporting goods dealer with offices in London, Birmingham & Mull. They were well known for their work with .22 target rifles. During the 1930s they imported from R.W.S. of Germany at least one lot of .22s privately labeled for them, even with their own headstamp.

CB-1 .22 CB– CAPS. “SAFETY KILLER—SMALL PIGS” Yellow one-piece box with black printing. “IC-6” h/s on a copper case.

S-1 .22 SHORT RIFLE. Box of 100. Buff two-piece box. Green label with black printing."G-l3" h/s on a copper case. Lead bullet. The bullet is the long rifle style bullet loaded into a short case, hence the wording SHORT RIFLE on top. Ref: Photo from the Metropolitan Police Forensic Science Laboratory, London. Exported by RWS

LR-1 .22 LONG RIFLE. Box of 100. Green label with black printing on a buff box. “G” h/s on copper case.

LR-5

The bullets of I.C.I. 22 sporting brands are lubricated with a dry lubricant so that they will not pick up dirt or grit if slipped in the pocket for convenience.

-22 I.C.I. Short Solid
- Recommended for small game, target and pistol shooting
- A general purpose high quality cartridge for short chambered weapons
- Copper case
- Nominal velocity—950 f.p.s.

-22 Long Rifle, Smokeless (I.C.I. Non-Rusting), Hollow Point
- Ideal for use with a sound moderator against small game
- Copper case
- Nominal velocity—1050 f.p.s.

-22 Long Rifle, High Velocity Solid
- For small game shooting at up to 200 yards
- Sustained velocity at 100 yards is 50%, more than that of a standard velocity 22
- Strengthened brass case
- Nominal velocity—115 f.p.s.
LR-1  **.22 LONG RIFLE.** Red and yellow box with black and white printing. One-piece box with end flaps. Copper case. Lead bullet. Variations noted:
(a) "A" bottom. "IC-4" h/s.
(b) "B" bottom. "IC-4" h/s.

LR-3  **.22 LONG RIFLE.** "ALL RANGE". Same as LR-1 except two stripes are added to the top of the box. This may be a target load. Variations noted:
(a) "A" bottom.
(b) "B" bottom.

LR-4

Note: LR = Long Rifle

LR ‘HIGH VELOCITY’
These cartridges give you extra range and extra hitting power for shooting small game. Solid or Hollow-nosed bullet.

* NOTE: For shooting fur-bearing animals without destroying the pelts, use ICI ‘22 Hollow-Point’ cartridges with solid bullet.

Sporting

Short ‘HIGH VELOCITY’
These cartridges give a third more power and a little more range than the standard velocity 22 Short. Available with solid bullet only.

Sporting

‘ICI-100’
TARGET CARTRIDGES
Suitable for ranges up to 100 yards. Long Rifle .22 M Calibre.

LR ‘ICI-100’

LR ‘RIFLE CLUB’ Mark 2
Loaded to the same ballistic specification as ‘ICI-100’, this cartridge is intended for general club use and as a practice cartridge. Also suitable for small game shooting.
LR-1  .22 LONG RIFLE (TARGET). "RIFLE CLUB—MARK 2". Red and yellow box with black printing. One-piece box with end flaps. No product code. Lead bullet. Variations noted:
(a)  "IC-8" h/s on a copper case. Side reads "NON-RUSTING"
(b)  "IC-3" h/s on a brass case. Side reads "NON-CORROSIVE".

LR-2  .22 LONG RIFLE (TARGET). "RIFLE CLUB—MARK 2". Same as LR-1 but single quotes instead of double quotes around ‘RIFLE CLUB’. “IC-3” h/s on brass case..

LR-3  .22 LONG RIFLE (TARGET). "RIFLE CLUB—MARK II". Similar to LR-1 except Mark 2 is now Mark II. This box also has an export to Canada over-label on bottom. “IC-1” h/s on brass case.

LR-4  .22 LONG RIFLE (TARGET). "RIFLE CLUB". Same as LR-1 but no MARK 2 beneath “RIFLE CLUB”. “IC-9” h/s on copper case.

(b) "IC-3" h/s on a brass case.

LR-4  **.22 LONG RIFLE (PROOF).** White box with blue printing. One-piece box with end flaps. "IC-3" h/s on a brass case. Lead bullet with 2K,IS. The bullets are black tipped.

With cattle, goats, sheep, and horses, a penetrating stunner is typically used since it destroys the cerebrum while leaving the brain stem intact; this results in a more consistently reliable stun, and ensures the animal's heart continues to beat during the bleeding process. Captive bolts allow for meat trimmings from the head to be salvaged. In some veal operations, a non-penetrating concussive stunner is used in order to preserve the brains for further processing.

The cartridges typically use 2 to 3 grains (130 to 190 mg) of smokeless powder, but can use up to 7 grains (450 mg) in the case of large animals such as bulls. The velocity of the bolt is usually 55 metres per second (180 ft/s) in the case of small animals and 75 metres per second (250 ft/s) in the case of large animals.

The name "Pulvite" was registered as a trademark for .22 rimfire cartridges by Martin Pulverman of London. Pulvite certainly sounds like it could be the name of a powder of that era.

Martin Pulverman was of German origin, and as you probably know "Pulver" is a German word for powder, and a lot of powders of that period end with the letters "ite". However, I can find no mention of "Pulvite" as a powder in the literature of that time. So I guess this is only a coincidence.

Martin Pulverman & Co. also sold air gun slugs under the trade name of "Arrite." I do not believe that Pulverman actually made any ammunition themselves. They were only one retailer. Their catalogs state that they are "Arms and Ammunition Merchants and Agents." It is not known who made the ammo for them, but probably either Eley or Kynoch?

I have not seen any other boxes than the .22 short that you picture, although the catalog lists others and the catalog illustration shows a different square shaped 100 round box. Little else is known about this short lived company, other than the circa 1905 catalog that I have.

Box and description courtesy Jim Buchanan

S-1 .22 SHORT. “PULVITE”. Buff two-piece, half-split box. Orange label with black printing. Orange side sealing band Contents unknown.

The Society or Miniature Riffle Clubs was an organization much like the N.R.A. of the U.S.A. except it was interested primarily in target shooting with the .22 rifle. It had a very large membership. They contracted with R.W.S. of Germany to produce special loadings for them. These boxes were produced in the 1930s.

S-1  **.22 SHORT** . “SMOKELESS”. Orange-pink label with black printing. Box of 100. Two-piece box with a slip in tray. Contents are unknown.
